

# SAFE Mission WebSite Proposal

**Prepared for:**

SAFE Steering Committee

**Prepared by:**

TekTechnologies - Craig Barkley

Prepared on: **2023-09-10**

Valid until: **2023-10-10**

## Our Proposal

We understand how hard it is to find the right web development partner and we're glad to know that you have chosen TekTechnologies to work with you on your web development project.

We're a solo team of professionals and we do our best to satisfy our clients' needs and expectations. Our team consists of one web developer and designer with 17+ years of active experience and they are all located in our office in Cedar Rapids, Ia. We don't work with freelance contractors.

We have a long list of successful projects with brands located in the US. We understand your regional specifics and we're really excited to be working with you.

If you think that we're the right fit for you and you decide to trust us with your project, just email confirmation and make initial project payment to initiate web site build. Review proposal on the last page and email response to us.

Thank you very much for considering our offer!

## Project Scope

The new website we'll build for the SAFE will allow you to reach a wider audience and will present the value you bring to your clients in a modern and more engaging way. The organic traffic to the website will increase, which should improve your conversion statistics.

## Our Solution

As we specialize in website integrations with WordPress, we suggest that your website is built with that CMS. It's one of the most well-known, highly developed, and advanced content management systems, which will allow you to easily maintain your website and let it grow where your needs lead you.

## Site Structure

This is how your website will be structured:

- **Home**
- **Mission**
- **Latest Posts**
- **Contact Us page.**
- **Fracking 101**
- **Donate Page**

## Service Integrations

We'll integrate your website with these three important services:

- **WordPress**
- **Google Email**
- **SSL**

# Progress Timetable

These are the main stages the website development will go through and the timeline of the project:

Stage	Completion Date
Project Scope	1 Jan 2024
Scrape Old Site Content	1 Oct 2023
Design Approval	1 Oct 2023
Website Development	1 Oct 2023
Changes and Additions	15 Nov 2023
Completing Development	15 Dec 2023
Quality Assurance Stage	15 Dec 2023
Official Launch	1 Jan 2024

Disclaimer: The dates for the delivery of each stage are estimated based on our previous experience with projects like yours. Having this in mind, we're keeping our right to adjust any of these dates once we have the final and complete list of project requirements with us.
